

Full-Length

NAT2 (Human) Recombinant Protein (P01)

Catalog # H00000010-P01

Size 25 ug, 10 ug

Applications

Specification

Product Description

Human NAT2 full-length ORF (AAH15878.1, 1 a.a. - 290 a.a.) recombinant protein with GST-tag at N-terminal.

Host

Wheat Germ (in vitro)

Theoretical MW (kDa)

57.42

Interspecies Antigen Sequence

Mouse (72); Rat (74)

Preparation Method

[in vitro wheat germ expression system](#)

Purification

Glutathione Sepharose 4 Fast Flow

Quality Control Testing

12.5% SDS-PAGE Stained with Coomassie Blue.

Storage Buffer

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

Storage Instruction

Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Note

Best use within three months from the date of receipt of this protein.

Applications

- Enzyme-linked Immunoabsorbent Assay
- Western Blot (Recombinant protein)
- Antibody Production
- Protein Array

Gene Description

N-acetyltransferase 2 (arylamine N-acetyltransferase)

Omim ID[243400](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

This gene encodes an enzyme that functions to both activate and deactivate arylamine and hydrazine drugs and carcinogens. Polymorphisms in this gene are responsible for the N-acetylation polymorphism in which human populations segregate into rapid, intermediate, and slow acetylator phenotypes. Polymorphisms in this gene are also associated with higher incidences of cancer and drug toxicity. A second arylamine N-acetyltransferase gene (NAT1) is located near this gene (NAT2).
