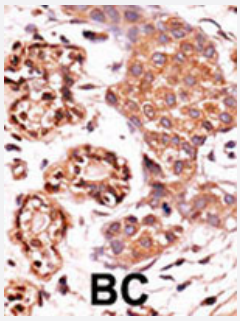
ABL1 (phospho Y393) polyclonal antibody

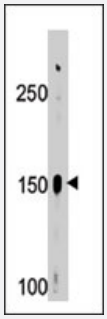
Catalog # PAB30835 Size 400 uL

Applications



Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) of human breast carcinoma with ABL1 (phospho Y393) polyclonal antibody (Cat # PAB30835), followed by peroxidase-conjugated secondary antibody and AEC staining.



Western Blot (Cell lysate)

Western Blot (Cell lysate) analysis of A2058 cell line lysate with ABL1 (phospho Y393) polyclonal antibody (Cat # PAB30835).

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic phosphopeptide of ABL1.
Immunogen	Synthetic phosphopeptide (conjugated with KLH) corresponding to residues surrounding Y393 of human ABL1.
Host	Rabbit
Reactivity	Human
Form	Liquid
Purification	Protein A purification

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Recommend Usage	Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (1:50-100) Dot Blot (1:100-500) Western Blot (1:1000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.09% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) of human breast carcinoma with ABL1 (phospho Y393) polyclonal antibody (Cat # PAB30835), followed by peroxidase-conjugated secondary antibody and AEC staining.

- Western Blot (Cell lysate)

  Western Blot (Cell lysate) analysis of A2058 cell line lysate with ABL1 (phospho Y393) polyclonal antibody (Cat # PAB30835).

- Dot Blot

Gene Info — ABL1

Entrez GeneID	25
Protein Accession#	P00519
Gene Name	ABL1
Gene Alias	ABL, JTK7, bcr/abl, c-ABL, p150, v-abl
Gene Description	c-abl oncogene 1, receptor tyrosine kinase
Omim ID	189980
Gene Ontology	Hyperlink

Gene Summary	The ABL1 protooncogene encodes a cytoplasmic and nuclear protein tyrosine kinase that has be en implicated in processes of cell differentiation, cell division, cell adhesion, and stress response. Activity of c-Abl protein is negatively regulated by its SH3 domain, and deletion of the SH3 domai n turns ABL1 into an oncogene. The t(9;22) translocation results in the head-to-tail fusion of the B CR (MIM:151410) and ABL1 genes present in many cases of chronic myelogeneous leukemia. T he DNA-binding activity of the ubiquitously expressed ABL1 tyrosine kinase is regulated by CDC 2-mediated phosphorylation, suggesting a cell cycle function for ABL1. The ABL1 gene is expres sed as either a 6- or 7-kb mRNA transcript, with alternatively spliced first exons spliced to the com mon exons 2-11. [provided by RefSeq
