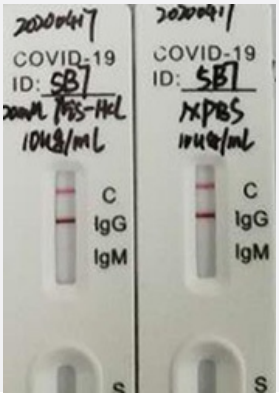
SARS-CoV-2 RecomAb™

SARS-CoV-2 N recombinant human antibody, clone 5B7

Catalog # RAB01040 Size 1 mg

Applications



Result zone of the Testing Strip indicates IgG line and control line (C line).

Specification

Product Description	Human recombinant monoclonal antibody raised against SARS-CoV-2 N.
Antibody Species	Human
Source / Expression System	HEK293
Immunogen	Original antibody is raised against recombinant protein corresponding to SARS-CoV-2 N.
Reactivity	SARS-CoV-2
Form	Liquid
Preparation Method	Mammalian cell (CHO) expression system
Purification	Protein A purification
Isotype	IgG
Quality Control Testing	Testing results of lateral flow immunoassay Result zone of the Testing Strip indicates IgG line and control line (C line).

Recommend Usage	Capture Antibody Detection Antibody ELISA Lateral-Flow Immunochromatographic Assay The optimal working dilution should be determined by the end user.
Storage Buffer	In 10 mM PBS
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Lateral-Flow Immunochromatographic Assay
- Enzyme-linked Immunoabsorbent Assay
- Detection Antibody
- Capture Antibody
