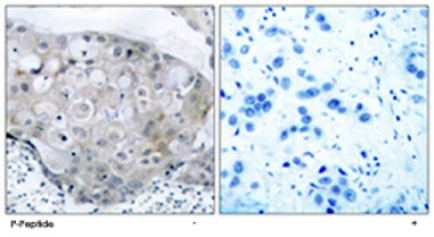
KDR (phospho Y951) polyclonal antibody

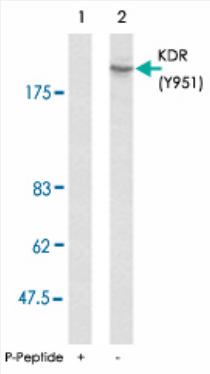
Catalog # PAB25305 Size 100 ug

Applications



Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using KDR (phospho Y951) polyclonal antibody (Cat # PAB25305).



Western Blot (Cell lysate)

Western blot analysis of extracts from SK-OV-3 cells using KDR (phospho Y951) polyclonal antibody (Cat # PAB25305).

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic phosphopeptide of KDR.
Immunogen	Synthetic phosphopeptide corresponding to residues surrounding Y951 of human KDR.
Sequence	K-D-Yp-V-G
Host	Rabbit
Theoretical MW (kDa)	230
Reactivity	Human, Mouse, Rat

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Form	Liquid
Purification	Affinity chromatography
Concentration	1 mg/mL
Recommend Usage	Immunohistochemistry (1:50-1:100) Western Blot (1:500-1:1000) Immunofluorescence (1:100-1:200) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (without Mg^{2+} and Ca^{2+}), 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide)
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using KDR (phospho Y951) polyclonal antibody (Cat # PAB25305).

- Immunofluorescence

- Western Blot (Cell lysate)

  Western blot analysis of extracts from SK-OV-3 cells using KDR (phospho Y951) polyclonal antibody (Cat # PAB25305).

Gene Info — KDR

Entrez GeneID	3791
Protein Accession#	P35968
Gene Name	KDR
Gene Alias	CD309, FLK1, VEGFR, VEGFR2
Gene Description	kinase insert domain receptor (a type III receptor tyrosine kinase)
Omim ID	191306 602089
Gene Ontology	Hyperlink

Gene Summary	Vascular endothelial growth factor (VEGF) is a major growth factor for endothelial cells. This gene encodes one of the two receptors of the VEGF. This receptor, known as kinase insert domain rec eptor, is a type III receptor tyrosine kinase. It functions as the main mediator of VEGF-induced end othelial proliferation, survival, migration, tubular morphogenesis and sprouting. The signalling and trafficking of this receptor are regulated by multiple factors, including Rab GTPase, P2Y purine nu cleotide receptor, integrin alphaVbeta3, T-cell protein tyrosine phosphatase, etc.. Mutations of thi s gene are implicated in infantile capillary hemangiomas. [provided by RefSeq
Other Designations	soluble VEGFR2|vascular endothelial growth factor receptor 2

Pathway

- Cytokine-cytokine receptor interaction
- Endocytosis
- Focal adhesion
- VEGF signaling pathway
