

# 8p Subtelomere(FITC) FISH Probe

Catalog # FE0071 Size 20 uL

### **Applications**

#### Hybridization position of the probes on the chromosome:

Hybridization position of the probes on the chromosome:

| Specification       |  |
|---------------------|--|
| Product Description | Labeled FISH probes for identification of subtelomere aberrations using Fluorescent In Situ Hybridiz ation Technique. (Technology).  |
| Probe               | Name: 8p Subtelomere   |
|                     | Size: Approximately 270kb  |
|                     | Fluorophore: FITC  |
|                     | Location: 8p Subtelomere   |
| Origin              | Human  |
| Source              | Genomic DNA  |
| Reactivity          | Human  |
| Notice              | We <b>strongly recommend</b> the customer to use FFPE FISH PreTreatment Kit 1 (Catalog #: KA2375 or KA2691) for the pretreatment of Formalin-Fixed Paraffin-Embedded (FFPE) tissue sections.   |
| Regulation Status   | For research use only (RUO)  |
| Recommend Usage     | The probe is provided in 5x concentrated format, to allow mixing of up to 5 Subtelomere FISH Probe s in a single hybridization assay. When used alone, it should be diluted to 1x with FISH Hybridization Buffer (Cat # <u>U0028</u> or <u>U0029</u> ) before use. |
| Supplied Product    | FISH Hybridization Buffer (80 uL)  |

### **Product Information**

| Storage Instruction | Store at 4°C in the dark.   |
|---------------------|---|
| Note                | Hybridization position of the probes on the chromosome: Hybridization position of the probes on the chromosome: |

## Applications

• Fluorescent In Situ Hybridization (Cell)
