

ALK monoclonal antibody (M06), clone 2A5

Catalog # H00000238-M06

Size 100 ug

Specification

Product Description	Mouse monoclonal antibody raised against human ALK.
Immunogen	A synthetic peptide corresponding to human ALK
Sequence	TPQWQVRTLKDARFQDHQDHC
Host	Mouse
Reactivity	Human
Interspecies Antigen Sequence	Mouse (71); Rat (63)
Isotype	IgG1 Kappa
Quality Control Testing	Antibody Reactive Against Recombinant Protein.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- ELISA

Gene Info — ALK

Entrez GeneID	238
GeneBank Accession#	BC156207.1
Protein Accession#	AA156208.1

Gene Name	ALK
Gene Alias	CD246, Ki-1, TFG/ALK
Gene Description	anaplastic lymphoma receptor tyrosine kinase
Omim ID	105590
Gene Ontology	Hyperlink
Gene Summary	The 2;5 chromosomal translocation is frequently associated with anaplastic large cell lymphomas (ALCLs). The translocation creates a fusion gene consisting of the ALK (anaplastic lymphoma kinase) gene and the nucleophosmin (NPM) gene: the 3' half of ALK, derived from chromosome 2, is fused to the 5' portion of NPM from chromosome 5. A recent study shows that the product of the NPM-ALK fusion gene is oncogenic. The deduced amino acid sequences reveal that ALK is a novel receptor protein-tyrosine kinase having a putative transmembrane domain and an extracellular domain. These sequences are absent in the product of the transforming NPM-ALK gene. ALK shows the greatest sequence similarity to LTK (leukocyte tyrosine kinase). ALK plays an important role in the development of the brain and exerts its effects on specific neurons in the nervous system. [provided by RefSeq]
Other Designations	ALK tyrosine kinase receptor CD246 antigen anaplastic lymphoma kinase (Ki-1) anaplastic lymphoma kinase Ki-1
