

## IL8 (Human) Matched Antibody Pair

Catalog # H00003576-AP41

Size 1 Set

### Applications

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

### Specification

|                                |                                                                                                                                                                                                                                                                                     |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Description</b>     | This antibody pair set comes with a matched antibody pair to detect and quantify the protein level of human IL8.                                                                                                                                                                    |
| <b>Reactivity</b>              | Human                                                                                                                                                                                                                                                                               |
| <b>Quality Control Testing</b> | Standard curve using recombinant protein as an analyte.<br>Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.                                                                                                                                                  |
| <b>Supplied Product</b>        | Antibody pair set content:<br>1. Capture antibody: mouse monoclonal anti-IL8, IgG2a Kappa (100 ug)<br>2. Detection antibody: biotinylated mouse monoclonal anti-IL8, IgG2a Kappa (50 ug)<br>*Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols. |
| <b>Storage Instruction</b>     | Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.                                                                                                  |

### Applications

- ELISA Pair (Recombinant protein)

## Gene Info — IL8

Entrez GeneID [3576](#)

Gene Name IL8

Gene Alias CXCL8, GCP-1, GCP1, LECT, LUCT, LYNAP, MDNCF, MONAP, NAF, NAP-1, NAP1

Gene Description interleukin 8

Omim ID [146930](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** The protein encoded by this gene is a member of the CXC chemokine family. This chemokine is one of the major mediators of the inflammatory response. This chemokine is secreted by several cell types. It functions as a chemoattractant, and is also a potent angiogenic factor. This gene is believed to play a role in the pathogenesis of bronchiolitis, a common respiratory tract disease caused by viral infection. This gene and other ten members of the CXC chemokine gene family form a chemokine gene cluster in a region mapped to chromosome 4q. [provided by RefSeq]

**Other Designations** T cell chemotactic factor|beta-thromboglobulin-like protein|chemokine (C-X-C motif) ligand 8|emoctakin|granulocyte chemotactic protein 1|lymphocyte-derived neutrophil-activating factor|monocyte-derived neutrophil chemotactic factor|neutrophil-activating p
