

# Protein Expression Kit II (His-Fusion Protein)

Catalog # KA1439

Size 1 Kit

## Specification

<b>Product Description</b>	This kit produces His-fusion proteins at high purities and high yields. The wheat germ included in this kit is a specialized high yield wheat germ extract prepared by removing endogenous proteins as non specifically adsorb to His-tag affinity purification resin.
<b>Pack Size</b>	Automatic synthesis 6 samples (6-mL translation)/run or 24 samples (1.2-mL translation)/run  Manual synthesis 6-well plates, 24-well plates or 96-well plates.
<b>Required Instrument</b>	Automatic synthesis: Protomist® DT II Manual synthesis: Incubator (transcription at 37°C, translation at 15-26°C)
<b>Regulation Status</b>	For research use only (RUO)
<b>Applied Instrument</b>	<a href="#">Protomist® DT II</a>
<b>Storage Instruction</b>	Store the component at -20°C or -80°C as shown on the protocol.

## Applications

- Purification
