

SARS-CoV-2

COVID-19 Neutralizing Antibody ELISA Kit

Catalog # KA6111 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification	
Product Description	COVID-19 Neutralizing Antibody ELISA Kit is an indirect enzyme-linked immunoassay (ELISA) for se mi-quantitative determination of COVID-19 neutralizing antibody.
Supplied Product	Kit content:
	1. Capture Plate
	2. Spike RBD Tag Fusion Protein
	3. SARS-CoV-2 Neutralizing Antibody Calibrator
	4. Positive Control
	5. Negative Control
	6. HRP Anti-Tag Antibody
	7. Blocking Buffer Concentrate (10X)
	8. Assay Diluent Concentrate (10X)
	9. Wash Buffer Concentrate (10X)
	10. TMB Solution
	11. Stop Solution
	12. Plate Sealer
Suitable Sample	Human Serum
Sample Volume	30 uL
Detection Method	Colorimetric
Assay Type	Semi-quantitative

Product Information

Regulatory Status	For research use only (RUO)
Quality Control Testing	Standard curve calibration The standard curve is for the purpose of illustration only and should not be used to calculate unknown
	s. A standard curve should be generated each time the assay is performed.
Storage Instruction	Store at -20°C:
	SARS-CoV-2 Neutralizing Antibody Calibrator
	Positive Control
	Negative Control
	HRP Anti-Tag Antibody
	Blocking Buffer Concentrate (10X)
	Assay Diluent Concentrate (10X)
	Store at room temperature:
	Wash Buffer Concentrate (10X)
	Stop Solution
	Plate Sealer
	Store at 2-8°C:
	Capture Plate
	Spike RBD Tag Fusion Protein
	TMB Solution

Applications

Semi-Quantification

Publication Reference

Safety and Immunogenicity of a Recombinant Receptor Binding Domain-Based Protein Subunit Vaccine
 (Noora Vaccine™) Against COVID-19 in Adults: A Randomized, Double-Blind, Placebo-Controlled, Phase 1
 Trial.

Journal of Medical Virology 2023 Feb; 95(2):10.1002/jm.

Application: Neutralization, Human, Human serum

Product Information

• Preclinical study of formulated recombinant nucleocapsid protein, the receptor binding domain of the spike protein, and truncated spike (S1) protein as vaccine candidates against COVID-19 in animal models.
