

Collagen

Catalog # P5215

Size 1 g

Specification

Product Description	Lyophilized, Shredded, insoluble preparation.
Biological function	Collagen is an inert, rigid protein found predominantly in skin, ligaments, bones and teeth. Its most distinctive characteristic in its role as a transmitter of mechanical force is its inelasticity.
Host	Bovine
Form	Lyophilized
Preparation Method	Native protein purified from Bovine Achilles Tendon according to the method of Einbinder and Schubert, J. Biol. Chem., 188, 335.(1951)
Recommend Usage	Substrate for collagenase
Storage Instruction	Store at 4°C. This product is stable for at least 3 months.

Applications

- Enzyme Substrate
