## Specification

|                            |                                                                                                                        |
|----------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Product Description</b> | Goat polyclonal antibody raised against partial recombinant hepatitis C virus E2.                                      |
| <b>Immunogen</b>           | Recombinant protein corresponding to amino acids 384-665 of hepatitis C virus E2 (genotype 1a).                        |
| <b>Host</b>                | Goat                                                                                                                   |
| <b>Reactivity</b>          | Viruses                                                                                                                |
| <b>Specificity</b>         | E2 envelope protein.                                                                                                   |
| <b>Form</b>                | Liquid                                                                                                                 |
| <b>Recommend Usage</b>     | The optimal working dilution should be determined by the end user.                                                     |
| <b>Storage Buffer</b>      | In 10 mM PBS, pH 7.2 (0.09% sodium azide)                                                                              |
| <b>Storage Instruction</b> | Store at 4°C. For long term storage store at -20°C.<br>Aliquot to avoid repeated freezing and thawing.                 |
| <b>Note</b>                | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |

## Applications

- Western Blot
- Immunofluorescence
- Enzyme-linked Immunoabsorbent Assay
- Enzyme Immunoassay
