IGF1R monoclonal antibody, clone 3G5C1

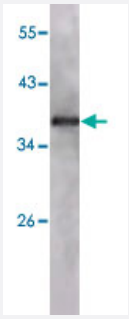

Catalog # MAB10693 Size 100 uL

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human ovarian cancer tissues (upper) and rectum cancer tissues (bottom) using IGF1R monoclonal antibody, clone 3G5C1 (Cat # MAB10693) with DAB staining.

Western Blot (Recombinant protein)

Western blot analysis using IGF1R monoclonal antibody, clone 3G5C1 (Cat # MAB10693) against truncated IGF1R recombinant protein.

Specification

Product Description	Mouse monoclonal antibody raised against partial recombinant IGF1R.
Immunogen	Recombinant protein corresponding to human IGF1R.
Host	Mouse
Reactivity	Human
Form	Liquid

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Isotype	IgG2a
Recommend Usage	ELISA (1:10000) Western Blot (1:500-1:2000) Immunohistochemistry (1:200-1:1000) The optimal working dilution should be determined by the end user.
Storage Buffer	In ascites (0.03% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Immunohistochemical analysis of paraffin-embedded human ovarian cancer tissues (upper) and rectum cancer tissues (bottom) using IGF1R monoclonal antibody, clone 3G5C1 (Cat # MAB10693) with DAB staining.

- Enzyme-linked Immunoabsorbent Assay

- Western Blot (Recombinant protein)

  Western blot analysis using IGF1R monoclonal antibody, clone 3G5C1 (Cat # MAB10693) against truncated IGF1R recombinant protein.

Gene Info — IGF1R

Entrez GeneID	3480
Gene Name	IGF1R
Gene Alias	CD221, IGFIR, JTK13, MGC142170, MGC142172, MGC18216
Gene Description	insulin-like growth factor 1 receptor
Omim ID	147370
Gene Ontology	Hyperlink
Gene Summary	This receptor binds insulin-like growth factor with a high affinity. It has tyrosine kinase activity. The insulin-like growth factor I receptor plays a critical role in transformation events. Cleavage of the pr ecursor generates alpha and beta subunits. It is highly overexpressed in most malignant tissues w here it functions as an anti-apoptotic agent by enhancing cell survival. [provided by RefSeq
