ACVR2B polyclonal antibody

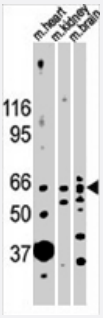

Catalog # PAB2022 Size 400 uL

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Formalin-fixed and paraffin-embedded human hepatocellular carcinoma tissue reacted with ACVR2B polyclonal antibody (Cat # PAB2022) , which was peroxidase-conjugated to the secondary antibody, followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry ; clinical relevance has not been evaluated. HC = hepatocarcinoma.

Western Blot (Tissue lysate)

Western blot analysis of ACVR2B polyclonal antibody (Cat # PAB2022) in mouse heart, kidney and brain lysates (35 ug/lane). ACVR2B (arrow) was detected using the purified Polyclonal antibody.

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of ACVR2B.
Immunogen	A synthetic peptide (conjugated with KLH) corresponding to N-terminus of human ACVR2B.
Host	Rabbit
Reactivity	Human
Form	Liquid
Purification	Ammonium sulfate precipitation

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Recommend Usage	Western Blot (1:1000) Immunohistochemistry (1:50-100) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.09% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Formalin-fixed and paraffin-embedded human hepatocellular carcinoma tissue reacted with ACVR2B polyclonal antibody (Cat # PAB2022) , which was peroxidase-conjugated to the secondary antibody, followed by AEC staining.
  This data demonstrates the use of this antibody for immunohistochemistry ; clinical relevance has not been evaluated. HC = hepatocarcinoma.

- Western Blot (Tissue lysate)

  Western blot analysis of ACVR2B polyclonal antibody (Cat # PAB2022) in mouse heart, kidney and brain lysates (35 ug/lane). ACVR2B (arrow) was detected using the purified Polyclonal antibody.

Gene Info — ACVR2B

Entrez GeneID	93
Protein Accession#	NP_001097;Q13705
Gene Name	ACVR2B
Gene Alias	ACTRIIB, ActR-IIB, MGC116908
Gene Description	activin A receptor, type IIB
Omim ID	602730
Gene Ontology	Hyperlink

Gene Summary	Activins are dimeric growth and differentiation factors which belong to the transforming growth factor-beta (TGF-beta) superfamily of structurally related signaling proteins. Activins signal through a heteromeric complex of receptor serine kinases which include at least two type I (I and IB) and two type II (II and IIB) receptors. These receptors are all transmembrane proteins, composed of a ligand-binding extracellular domain with cysteine-rich region, a transmembrane domain, and a cytoplasmic domain with predicted serine/threonine specificity. Type I receptors are essential for signaling; and type II receptors are required for binding ligands and for expression of type I receptors. Type I and II receptors form a stable complex after ligand binding, resulting in phosphorylation of type I receptors by type II receptors. Type II receptors are considered to be constitutively active kinases. This gene encodes activin A type IIB receptor, which displays a 3- to 4-fold higher affinity for the ligand than activin A type II receptor. [provided by RefSeq
Other Designations	activin A type IIB receptor
