RecomAb™ Sm Size

NR3C1 recombinant monoclonal antibody, clone 2D8

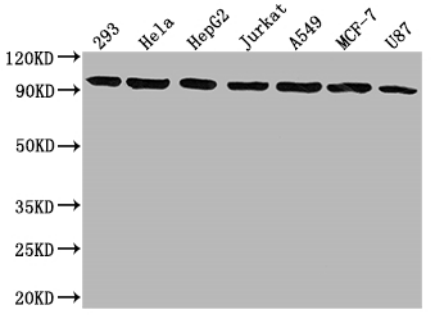

Catalog # RAB08101 Size 50 uL

Applications

Flow Cytometry

Overlay histogram showing Jurkat cells stained with NR3C1 recombinant monoclonal antibody, clone 2D8 (red line) at 1:50.

Western Blot

Western Blot analysis of
Lane 1: 293 whole cell lysate;
Lane 2: Hela whole cell lysate;
Lane 3: HepG2 whole cell lysate;
Lane 4: Jurkat whole cell lysate;
Lane 5: A549 whole cell lysate;
Lane 6: MCF-7 whole cell lysate;
Lane 7: U87 whole cell lysate.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human NR3C1.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant protein corresponding to full length human NR3C1.
Reactivity	Human
Form	Liquid

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Preparation Method	Mammalian cell (HEK293) expression system
Purification	Affinity-chromatography
Isotype	IgG
Recommend Usage	ELISA Flow Cytometry (1:20-1:200) Western Blot (1:500-1:5000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.4 (150mM NaCl, 50% glycerol and 0.02% sodium azide)
Storage Instruction	Store at -20 °C or -80 °C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Flow Cytometry

  Overlay histogram showing Jurkat cells stained with NR3C1 recombinant monoclonal antibody, clone 2D8 (red line) at 1:50.

- Enzyme-linked Immunoabsorbent Assay

- Western Blot

  Western Blot analysis of
  Lane 1: 293 whole cell lysate;
  Lane 2: Hela whole cell lysate;
  Lane 3: HepG2 whole cell lysate;
  Lane 4: Jurkat whole cell lysate;
  Lane 5: A549 whole cell lysate;
  Lane 6: MCF-7 whole cell lysate;
  Lane 7: U87 whole cell lysate.

Gene Info — NR3C1

Entrez GeneID	2908
Protein Accession#	P04150
Gene Name	NR3C1
Gene Alias	GCCR, GCR, GR, GRL

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Gene Description	nuclear receptor subfamily 3, group C, member 1 (glucocorticoid receptor)
Omim ID	138040
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a receptor for glucocorticoids that can act as both a transcrip tion factor and as a regulator of other transcription factors. This protein can also be found in heter omeric cytoplasmic complexes along with heat shock factors and immunophilins. The protein is ty pically found in the cytoplasm until it binds a ligand, which induces transport into the nucleus. Mutat ions in this gene are a cause of glucocorticoid resistance, or cortisol, resistance. Alternate splicin g, the use of at least three different promoters, and alternate translation initiation sites result in sev eral transcript variants encoding the same protein or different isoforms, but the full-length nature of some variants has not been determined. [provided by RefSeq
Other Designations	nuclear receptor subfamily 3, group C, member 1

Pathway

- Neuroactive ligand-receptor interaction
