CHEK2 (phospho T68) monoclonal antibody, clone D12

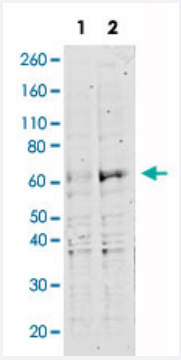

Catalog # MAB18870 Size 20 uL

Applications

Flow Cytometry

Flow cytometric analysis of Jurkat cells with CHEK2 (phospho T68) monoclonal antibody, clone D12 (Cat # MAB18870). Secondary antibody only negative control (blue) or untreated (red) or treated with Calyculin A (green).

Western Blot (Cell lysate)

Western Blot analysis of HEK293 cell lysate with CHEK2 (phospho T68) monoclonal antibody, clone D12 (Cat # MAB18870). Lane 1: untreated or Lane 2: treated with UV.

Specification

Product Description	Rabbit monoclonal antibody raised against synthetic phosphopeptide of human CHEK2.
Immunogen	A synthetic phosphopeptide corresponding to residues surrounding T68 of human CHEK2.
Host	Rabbit
Reactivity	Human, Mouse
Form	Liquid
Purification	Protein A/G purification

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Isotype	IgG1, kappa
Recommend Usage	Flow Cytometry Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (50% glycerol, 0.1% BSA and 0.02% sodium azide).
Storage Instruction	Store at -20°C.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Flow Cytometry

  Flow cytometric analysis of Jurkat cells with CHEK2 (phospho T68) monoclonal antibody, clone D12 (Cat # MAB18870). Secondary antibody only negative control (blue) or untreated (red) or treated with Calyculin A (green).

- Western Blot (Cell lysate)

  Western Blot analysis of HEK293 cell lysate with CHEK2 (phospho T68) monoclonal antibody, clone D12 (Cat # MAB18870). Lane 1: untreated or Lane 2: treated with UV.

Gene Info — CHEK2

Entrez GeneID	11200
Gene Name	CHEK2
Gene Alias	CDS1, CHK2, HuCds1, LFS2, PP1425, RAD53
Gene Description	CHK2 checkpoint homolog (S. pombe)
Omim ID	114480 176807 259500 604373 609265
Gene Ontology	Hyperlink

Gene Summary	In response to DNA damage and replication blocks, cell cycle progression is halted through the control of critical cell cycle regulators. The protein encoded by this gene is a cell cycle checkpoint regulator and putative tumor suppressor. It contains a forkhead-associated protein interaction domain essential for activation in response to DNA damage and is rapidly phosphorylated in response to replication blocks and DNA damage. When activated, the encoded protein is known to inhibit CDC25C phosphatase, preventing entry into mitosis, and has been shown to stabilize the tumor suppressor protein p53, leading to cell cycle arrest in G1. In addition, this protein interacts with and phosphorylates BRCA1, allowing BRCA1 to restore survival after DNA damage. Mutations in this gene have been linked with Li-Fraumeni syndrome, a highly penetrant familial cancer phenotype usually associated with inherited mutations in TP53. Also, mutations in this gene are thought to confer a predisposition to sarcomas, breast cancer, and brain tumors. This nuclear protein is a member of the CDS1 subfamily of serine/threonine protein kinases. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq
