Bioactive | Full-Length | Sm Size

IL4 (Human) Recombinant Protein

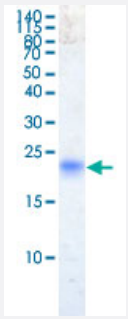

Catalog # P5823 Size 100 ug, 50 ug, 10 ug

Applications

Western Blot (Recombinant protein)

Western blot analysis of IL4 (Human) Recombinant Protein (Cat # P5823) using protein specific antibody.

Result of activity analysis

Result of activity analysis

Specification

Product Description	Human IL4 (130 a.a.) full-length recombinant protein with His tag expressed in Barley grain (*Hordeum vulgare*).

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Host	Plants
Theoretical MW (kDa)	17.2
Form	Lyophilized
Preparation Method	Barley grain (*Hordeum vulgare*) expression system
Purification	Chromatography
Concentration	100 ug/mL
Purity	> 95% by SDS-PAGE
Endotoxin Level	Endotoxin level is less than 0.005ng per ug protein (0.05EU/ug) as measured by turbidimetric kinetic assay
Activity	The bioactivity is determined by the cell proliferation assay for IL4 for dose-dependent cell proliferation of human TF-1 cells. The ED_{50} value for this effect is typically < 0.3 ng/mL, corresponding to a specific activity > 3.3 x 10e6 units/mg. Optimal concentration should be determined for specific applications and cell lines.
Quality Control Testing	SDS-PAGE Stained with Coomassie Blue
Storage Buffer	Lyophilized from PBS, pH7,2.
Storage Instruction	Store at -20°C on dry atmosphere. After reconstitution with sterile water to a concentration of no less than 100 ug/mL, store at -20°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Aliquot to avoid repeated freezing and thawing.
Note	Result of activity analysis Result of activity analysis

Applications

- Functional Study
- Western Blot (Recombinant protein)

  Western blot analysis of IL4 (Human) Recombinant Protein (Cat # P5823) using protein specific antibody.
- SDS-PAGE

Gene Info — IL4

Entrez GeneID	3565
Protein Accession#	NP_000580
Gene Name	IL4
Gene Alias	BCGF-1, BCGF1, BSF1, IL-4, MGC79402
Gene Description	interleukin 4
Omim ID	147780
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a pleiotropic cytokine produced by activated T cells. This cytokine is a ligand for interleukin 4 receptor. The interleukin 4 receptor also binds to IL13, which may contribute to many overlapping functions of this cytokine and IL13. STAT6, a signal transducer and activator of transcription, has been shown to play a central role in mediating the immune regulatory signal of this cytokine. This gene, IL3, IL5, IL13, and CSF2 form a cytokine gene cluster on chromosome 5q, with this gene particularly close to IL13. This gene, IL13 and IL5 are found to be regulated coordinately by several long-range regulatory elements in an over 120 kilobase range on the chromosome. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq
Other Designations	B cell growth factor 1|B_cell stimulatory factor 1|lymphocyte stimulatory factor 1
