HSPB8 polyclonal antibody

Catalog # PAB15424 Size 100 uL

Applications

Immunofluorescence

Immunofluorescence staining of mouse spinal cord with HSPB8 polyclonal antibody (Cat # PAB15424).

Specification

Product Description	Rabbit polyclonal antibody raised against HSPB8.
Immunogen	Human HSPB8.
Host	Rabbit
Reactivity	Human, Mouse, Rat
Specificity	Detects ~22KDa. Does not cross-react with Hsp27 or alpha-crystallin.
Form	Liquid
Purification	Peptide affinity purification
Recommend Usage	Immunofluorescence (1:100) Immunohistochemistry (1:100) Immunoprecipitation Western Blot (1:1000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.4 (50% glycerol, 0.09% sodium azide).

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry
- Immunofluorescence

  Immunofluorescence staining of mouse spinal cord with HSPB8 polyclonal antibody (Cat # PAB15424).
- Immunoprecipitation
- Western Blot

Gene Info — HSPB8

Entrez GeneID	26353
Gene Name	HSPB8
Gene Alias	CMT2L, DHMN2, E2IG1, H11, HMN2, HMN2A, HSP22
Gene Description	heat shock 22kDa protein 8
Omim ID	158590 608014 608673
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene belongs to the superfamily of small heat-shock proteins containi ng a conservative alpha-crystallin domain at the C-terminal part of the molecule. The expression o f this gene in induced by estrogen in estrogen receptor-positive breast cancer cells, and this prote in also functions as a chaperone in association with Bag3, a stimulator of macroautophagy. Thus, this gene appears to be involved in regulation of cell proliferation, apoptosis, and carcinogenesis, and mutations in this gene have been associated with different neuromuscular diseases, including Charcot-Marie-Tooth disease. [provided by RefSeq
Other Designations	E2-induced gene 1|heat shock 27kDa protein 8|heat shock protein beta-8|protein kinase H11|sm all stress protein-like protein HSP22
