RecomAb™ Sm Size

PRKCB recombinant monoclonal antibody

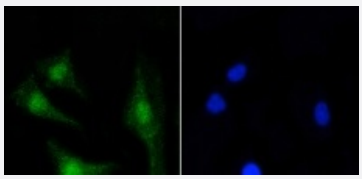

Catalog # RAB09432 Size 50 uL

Applications

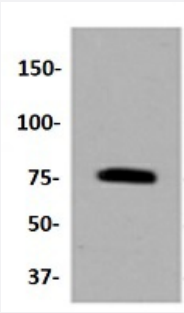

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human spleen tissue using PRKCB recombinant monoclonal antibody (Cat # RAB09432). Counter stained with hematoxylin.

Immunocytochemistry

Immunocytochemical staining of SH-SY-5Y cells using PRKCB recombinant monoclonal antibody (Cat # RAB09432)(green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton *100/PBS.

Western Blot (Cell lysate)

Western blot analysis of Lane1:Raji whole cell lysate with PRKCB recombinant monoclonal antibody (Cat # RAB09432) at 1:1000 dilution.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against PRKCB.

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant PRKCB.
Theoretical MW (kDa)	82
Reactivity	Human, Mouse, Rat
Specificity	This antibody detects endogenous levels of PKC beta and does not cross-react with related proteins .
Form	Liquid
Preparation Method	Mammalian cell (HEK293) expression system
Purification	Protein A purification
Isotype	IgG
Recommend Usage	Flow Cytometry (1:50-1:100) Immunocytochemistry (1:50-1:200) Immunofluorescence (1:50-1:200) Immunohistochemistry (1:50-1:200) Western Blot (1:1000-1:2000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.2 (50% glycerol and 0.02% sodium azide)
Storage Instruction	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Immunohistochemical analysis of paraffin-embedded human spleen tissue using PRKCB recombinant monoclonal antibody (Cat # RAB09432). Counter stained with hematoxylin.

- Immunocytochemistry

  Immunocytochemical staining of SH-SY-5Y cells using PRKCB recombinant monoclonal antibody (Cat # RAB09432)(green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton *100/PBS.

Copyright © 2023 Abnova Corporation. All Rights Reserved.

- Western Blot (Cell lysate)

  Western blot analysis of Lane1:Raji whole cell lysate with PRKCB recombinant monoclonal antibody (Cat # RAB09432) at 1:1000 dilution.

Gene Info — PRKCB

Entrez GeneID	5579
Protein Accession#	P05771
Gene Name	PRKCB
Gene Alias	MGC41878, PKC-beta, PKCB, PRKCB1, PRKCB2
Gene Description	protein kinase C, beta
Omim ID	176970
Gene Ontology	Hyperlink
Gene Summary	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be a ctivated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoter s. Each member of the PKC family has a specific expression profile and is believed to play a disti nct role in cells. The protein encoded by this gene is one of the PKC family members. This protein kinase has been reported to be involved in many different cellular functions, such as B cell activati on, apoptosis induction, endothelial cell proliferation, and intestinal sugar absorption. Studies in m ice also suggest that this kinase may also regulate neuronal functions and correlate fear-induced conflict behavior after stress. Alternatively spliced transcript variants encoding distinct isoforms ha ve been reported. [provided by RefSeq
Other Designations	protein kinase C, beta 1 polypeptide

Pathway

- B cell receptor signaling pathway
- Calcium signaling pathway
- Chemokine signaling pathway
- ErbB signaling pathway
- Fc epsilon RI signaling pathway
