# Anti-Ranibizumab recombinant monoclonal antibody, clone 10D12

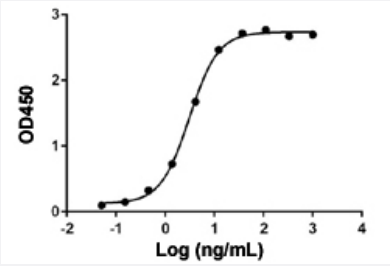

Catalog # RAB09613 Size 40 ug

## Applications

### Sandwich ELISA

Standard curve of Ranibizumab Sandwich ELISA. The Ranibizumab Sandwich ELISA assay is developed by using Anti-Ranibizumab monoclonal antibody, clone 6C3 (Cat # RAB09612) and Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) as the capture and detection antibodies, respectively. In this ELISA assay, Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) was labeled with Biotin. The sensitivity of detecting Ranibizumab is up to 0.05 ng/mL.

### Enzyme-linked Immunoabsorbent Assay

ELISA binding of Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) with Ranibizumab. While the antibody does not recognize the human IgG (data not shown). Coating antigen: Ranibizumab, 1 ug/mL. Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) dilution start from 1000 ng/mL. $EC_{50}$ = 3.101 ng/mL.

## Specification

| | |
|---|---|
| **Product Description** | Recombinant mouse monoclonal antibody raised against Ranibizumab. Target gene is VEGFA. |
| **Immunogen** | Ranibizumab. |
| **Host** | Mouse |
| **Specificity** | The product is specific for Ranibizumab. The antibody is recommended as a detection antibody in a pharmacokinetic (PK) bridging assay with capture antibody Anti-Ranibizumab recombinant monoclonal antibody, clone 6C3 (Cat # RAB09612). |
| **Form** | Lyophilized |

Copyright © 2023 Abnova Corporation. All Rights Reserved.

| | |
|---|---|
| **Preparation Method** | This antibody is produced from a hybridoma resulting from the fusion of partner and B-lymphocytes obtained from a mouse immunized with Ranibizumab. |
| **Purification** | Protein A purification |
| **Isotype** | IgG1, kappa |
| **Recommend Usage** | ELISA (ELISA detection: 0.01-0.1 ug/mL) (Direct/Indirect ELISA)<br>Sandwich ELISA<br>The optimal working dilution should be determined by the end user. |
| **Inhibitory IC50** | Non-inhibitory |
| **Storage Buffer** | Lyophilized from PBS, pH 7.4 (0.02% sodium azide). |
| **Storage Instruction** | Store at -20°C on dry atmospher. The lyophilized product remains stable up to 1 year at -20°C from date of receipt.<br>After reconstitution with deionized water (or equivalent) to a final concentration of 0.5 mg/mL, it can be stored for 2-3 weeks at 2-8°C or for up to 12 months at -20°C or below.<br>Aliquot to avoid repeated freezing and thawing. |
| **Note** | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |

## Applications

- Sandwich ELISA

  Standard curve of Ranibizumab Sandwich ELISA. The Ranibizumab Sandwich ELISA assay is developed by using Anti-Ranibizumab monoclonal antibody, clone 6C3 (Cat # RAB09612) and Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) as the capture and detection antibodies, respectively. In this ELISA assay, Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) was labeled with Biotin. The sensitivity of detecting Ranibizumab is up to 0.05 ng/mL.

- Enzyme-linked Immunoabsorbent Assay

  ELISA binding of Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) with Ranibizumab. While the antibody does not recognize the human IgG (data not shown). Coating antigen: Ranibizumab, 1 ug/mL. Anti-Ranibizumab monoclonal antibody, clone 10D12 (Cat # RAB09613) dilution start from 1000 ng/mL. $EC_{50}$ = 3.101 ng/mL.

## Gene Info — VEGFA

| | |
|---|---|
| **Entrez GeneID** | 7422 |
| **Gene Name** | VEGFA |
| **Gene Alias** | MGC70609, VEGF, VEGF-A, VPF |
| **Gene Description** | vascular endothelial growth factor A |

Copyright © 2023 Abnova Corporation. All Rights Reserved.

| | |
|---|---|
| **Omim ID** | 125853 192240 |
| **Gene Ontology** | Hyperlink |
| **Gene Summary** | This gene is a member of the PDGF/VEGF growth factor family and encodes a protein that is often found as a disulfide linked homodimer. This protein is a glycosylated mitogen that specifically acts on endothelial cells and has various effects, including mediating increased vascular permeability, inducing angiogenesis, vasculogenesis and endothelial cell growth, promoting cell migration, and inhibiting apoptosis. Elevated levels of this protein is linked to POEMS syndrome, also known as Crow-Fukase syndrome. Mutations in this gene have been associated with proliferative and nonproliferative diabetic retinopathy. Alternatively spliced transcript variants, encoding either freely secreted or cell-associated isoforms, have been characterized. There is also evidence for the use of non-AUG (CUG) translation initiation sites upstream of, and in-frame with the first AUG, leading to additional isoforms. [provided by RefSeq |
| **Other Designations** | vascular endothelial growth factor isoform VEGF165\|vascular permeability factor |
