Bioactive | Full-Length | Sm Size

VEGFA (Human) Recombinant Protein

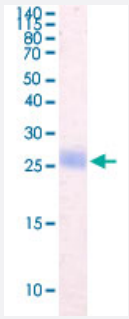

Catalog # P5816 Size 100 ug, 50 ug, 10 ug

Applications

Western Blot (Recombinant protein)

Western blot analysis of VEGFA (Human) Recombinant Protein (Cat # P5816) using protein specific antibody.

Result of activity analysis

Result of activity analysis

Specification

Product Description	Human VEGFA (165 a.a.) full-length recombinant protein with His tag expressed in Barley grain (*Hordeum vulgare*).

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Host	Plants
Theoretical MW (kDa)	30
Form	Lyophilized
Preparation Method	Barley grain (*Hordeum vulgare*) expression system
Purification	Chromatography
Concentration	100 ug/mL
Purity	> 95% by SDS-PAGE
Endotoxin Level	Endotoxin level is less than 0.005ng per ug protein (0.05EU/ug) as measured by turbidimetric kinetic assay
Activity	The ED_{50} is determined by Cell Proliferation Assay for the dose-dependent effects of serial dilutions of recombinant human VEGFA on HUVEC cells. The ED_{50} value was determined to be 0.58 ng/mL.
Quality Control Testing	SDS-PAGE Stained with Coomassie Blue
Storage Buffer	Lyophilized from PBS, pH 7.2
Storage Instruction	Store at -20°C on dry atmosphere. After reconstitution with sterile water to a concentration of no less than 100 ug/mL, store at -20°C. Fo r long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Aliquot to avoid repeated freezing and thawing.
Note	Result of activity analysis Result of activity analysis

Applications

- Functional Study
- Western Blot (Recombinant protein)

  Western blot analysis of VEGFA (Human) Recombinant Protein (Cat # P5816) using protein specific antibody.
- SDS-PAGE

Gene Info — VEGFA

Entrez GeneID	7422

Protein Accession#	NP_001165097
Gene Name	VEGFA
Gene Alias	MGC70609, VEGF, VEGF-A, VPF
Gene Description	vascular endothelial growth factor A
Omim ID	125853 192240
Gene Ontology	Hyperlink
Gene Summary	This gene is a member of the PDGF/VEGF growth factor family and encodes a protein that is ofte n found as a disulfide linked homodimer. This protein is a glycosylated mitogen that specifically a cts on endothelial cells and has various effects, including mediating increased vascular permeabil ity, inducing angiogenesis, vasculogenesis and endothelial cell growth, promoting cell migration, and inhibiting apoptosis. Elevated levels of this protein is linked to POEMS syndrome, also know n as Crow-Fukase syndrome. Mutations in this gene have been associated with proliferative and nonproliferative diabetic retinopathy. Alternatively spliced transcript variants, encoding either freel y secreted or cell-associated isoforms, have been characterized. There is also evidence for the u se of non-AUG (CUG) translation initiation sites upstream of, and in-frame with the first AUG, lead ing to additional isoforms. [provided by RefSeq
Other Designations	vascular endothelial growth factor isoform VEGF165|vascular permeability factor
