Bioactive

NGF (Human) Recombinant Protein

Catalog # P8484 Size 20 ug

Specification

Product Description	Human NGF (P01138, 122 a.a. - 239 a.a.) partial-length recombinant protein expressed in CHO cells.
Host	Human
Theoretical MW (kDa)	26.5
Form	Lyophilized
Preparation Method	CHO cell expression system
Purity	> 95% by HPLC and SDS PAGE
Activity	The ED_{50}, calculated by the ability to stimulate chick E9 DRG neurite outgrowth was found to be > 1.0 ng/mL, corresponding to a specific activity of < 1 x 10^6 units/mg.
Storage Buffer	The protein was lyophilized from a 0.2um filtered solution in 20mM PB and 250mM NaCl, pH 7.0.
Storage Instruction	Store at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles.

Applications

- Functional Study
- SDS-PAGE

Gene Info — NGF

Entrez GeneID	4803
Protein Accession#	P01138

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Gene Name	NGF
Gene Alias	Beta-NGF, HSAN5, MGC161426, MGC161428, NGFB
Gene Description	nerve growth factor (beta polypeptide)
Omim ID	162030 608654
Gene Ontology	Hyperlink
Gene Summary	This gene is a member of the NGF-beta family and encodes a secreted protein which homodimerizes and is incorporated into a larger complex. This protein has nerve growth stimulating activity and the complex is involved in the regulation of growth and the differentiation of sympathetic and certain sensory neurons. Mutations in this gene have been associated with hereditary sensory and autonomic neuropathy, type 5 (HSAN5), and dysregulation of this gene's expression is associated with allergic rhinitis. [provided by RefSeq
Other Designations	OTTHUMP00000013653|beta-nerve growth factor|nerve growth factor, beta polypeptide|nerve growth factor, beta subunit

Pathway

- Apoptosis
- MAPK signaling pathway
- Neurotrophin signaling pathway

Disease

- Alzheimer disease
- Anxiety Disorders
- Asperger Syndrome
- Asthma
- Attention Deficit Disorder with Hyperactivity
- Autistic Disorder
- Bronchiolitis
- Dermatitis
- Disease Models
