RecomAb™

CDKN2A recombinant monoclonal antibody, clone R02-6H1

Catalog # RAB01508 Size 100 uL

Applications

Western Blot

Western blot analysis of CDKN2A/p16INK4a in 3T3, Hela lysates using human CDKN2A recombinant monoclonal antibody, clone R02-6H1 (Cat # RAB01508).

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human CDKN2A/p16INK4a.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant protein corresponding to human CDKN2A/p16INK4a
Theoretical MW (kDa)	Calculated MW: 17 kD
Reactivity	Human
Form	Liquid
Preparation Method	Mammalian cell (CHO) expression system
Purification	Affinity purification
Isotype	IgG
Recommend Usage	Immunoprecipitation (1:20) Western Blot (1:500-1:1000) The optimal working dilution should be determined by the end user.

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Buffer	In 50 mM Tris-Glycine pH 7.4 (0.15 M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% BSA).
Storage Instruction	Store at 4°C for short term. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunoprecipitation
- Western Blot

  Western blot analysis of CDKN2A/p16INK4a in 3T3, Hela lysates using human CDKN2A recombinant monoclonal antibody, clone R02-6H1 (Cat # RAB01508).

Gene Info — CDKN2A

Entrez GeneID	1029
Protein Accession#	P42771
Gene Name	CDKN2A
Gene Alias	ARF, CDK4I, CDKN2, CMM2, INK4, INK4a, MLM, MTS1, TP16, p14, p14ARF, p16, p16INK4, p1 6INK4a, p19
Gene Description	cyclin-dependent kinase inhibitor 2A (melanoma, p16, inhibits CDK4)
Omim ID	151623 155601 155755 600160 606719
Gene Ontology	Hyperlink
Gene Summary	This gene generates several transcript variants which differ in their first exons. At least three altern atively spliced variants encoding distinct proteins have been reported, two of which encode struct urally related isoforms known to function as inhibitors of CDK4 kinase. The remaining transcript in cludes an alternate first exon located 20 Kb upstream of the remainder of the gene; this transcript contains an alternate open reading frame (ARF) that specifies a protein which is structurally unrel ated to the products of the other variants. This ARF product functions as a stabilizer of the tumor s uppressor protein p53 as it can interact with, and sequester, MDM1, a protein responsible for the degradation of p53. In spite of the structural and functional differences, the CDK inhibitor isoforms and the ARF product encoded by this gene, through the regulatory roles of CDK4 and p53 in cell c ycle G1 progression, share a common functionality in cell cycle G1 control. This gene is frequently mutated or deleted in a wide variety of tumors, and is known to be an important tumor suppressor gene. [provided by RefSeq
