RecomAb™

IFNG recombinant monoclonal antibody, clone D9D10

Catalog # RAB03552 Size 200 ug

Applications

Western Blot

Western blot analysis of human thymus lysate with IFNG recombinant monoclonal antibody, clone D9D10 (Cat # RAB03552).
Western Blot analysis the lysates (35ug protein in RIPA buffer) were resolved on a 15% SDS PAGE gel and blots were probed with the chimeric r version of RAB03552 at 0.1 ug/mL before detection using an anti-rondary antibody. A primary incubation of 1h was used and protein was detected by chemiluminescence.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human IFNG.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against FPLC-purified natural human IFNG.
Reactivity	Human
Form	Liquid
Preparation Method	Mammalian cell (HEK293) expression system
Isotype	IgG
Recommend Usage	Blocking ELISA Flow Cytometry Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS with 0.02% Proclin 300

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Instruction	Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Flow Cytometry
- Enzyme-linked Immunoabsorbent Assay
- Western Blot

  Western blot analysis of human thymus lysate with IFNG recombinant monoclonal antibody, clone D9D10 (Cat # RAB03552). Western Blot analysis the lysates (35ug protein in RIPA buffer) were resolved on a 15% SDS PAGE gel and blots were probed with the chimeric r version of RAB03552 at 0.1 ug/mL before detection using an anti-rondary antibody. A primary incubation of 1h was used and protein was detected by chemiluminescence.

Gene Info — IFNG

Entrez GeneID	3458
Gene Name	IFNG
Gene Alias	IFG, IFI
Gene Description	interferon, gamma
Omim ID	147570 191100 607948 609135 609423
Gene Ontology	Hyperlink
Gene Summary	Interferon-gamma (IFNG), or type II interferon, is a cytokine critical for innate and adaptive immunity against viral and intracellular bacterial infections and for tumor control. Aberrant IFNG expression is associated with a number of autoinflammatory and autoimmune diseases. The importance of IFNG in the immune system stems in part from its ability to inhibit viral replication directly, but most importantly derives from its immunostimulatory and immunomodulatory effects. IFNG is produced predominantly by natural killer (NK) and natural killer T (NKT) cells as part of the innate immune response, and by CD4 (MIM 186940) and CD8 (see MIM 186910) cytotoxic T lymphocyte (CTL) effector T cells once antigen-specific immunity develops (Schoenborn and Wilson, 2007 [PubMed 17981204]).[supplied by OMIM
