RecomAb™ Sm Size

ITGAL recombinant monoclonal antibody, clone 2B2

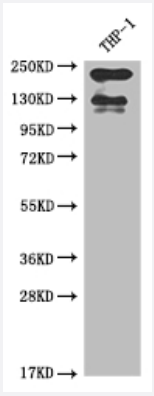

Catalog # RAB08739 Size 50 uL

Applications

Immunofluorescence

Immunofluorescent staining of THP-1 Cells with ITGAL recombinant monoclonal antibody, counter-stained with DAPI. The cells were fixed in 4% formaldehyde and blocked in 10% normal Goat Serum. The cells were then incubated with the antibody overnight at 4°C. The secondary antibody was Alexa Fluor 490-congugated AffiniPure Goat Anti-Rabbit IgG(H+L).

Western Blot (Cell lysate)

Western blot analysis of THP-1 whole cell lysate with ITGAL recombinant monoclonal antibody.

Gene Summary	ITGAL encodes the integrin alpha L chain. Integrins are heterodimeric integral membrane protein s composed of an alpha chain and a beta chain. This I-domain containing alpha integrin combine s with the beta 2 chain (ITGB2) to form the integrin lymphocyte function-associated antigen-1 (LF A-1), which is expressed on all leukocytes. LFA-1 plays a central role in leukocyte intercellular adh esion through interactions with its ligands, ICAMs 1-3 (intercellular adhesion molecules 1 through 3), and also functions in lymphocyte costimulatory signaling. Two transcript variants encoding diffe rent isoforms have been found for this gene. [provided by RefSeq
