RecomAb™ Sm Size

# EGFR recombinant monoclonal antibody

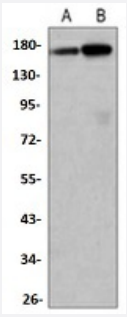

Catalog # RAB09098 Size 50 uL

## Applications

### Immunofluorescence

Immunofluorescent analysis of HeLa cells with EGFR recombinant monoclonal antibody (Cat # RAB09098). Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a hidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark.

### Western Blot

Western blot analysis of Hela (A), mouse liver (B) whole cell lysates with EGFR recombinant monoclonal antibody (Cat # RAB09098).

| **Gene Description** | epidermal growth factor receptor (erythroblastic leukemia viral (v-erb-b) oncogene homolog, avian ) |
| **Omim ID** | 131550 211980 |
| **Gene Ontology** | Hyperlink |
| **Gene Summary** | The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protei n kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a lig and induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation . Mutations in this gene are associated with lung cancer.
