Human DLL3 Overexpression HEK293F Cell Line

Catalog # U0616 Size

Applications

Flow Cytometry

Untransfected HEK293 cells (green line) and transfected Human DLL3 HEK293 stable cells (red line) were stained with anti-DLL3 antibody (rovalpituzumab-like), washed and then followed by FITC-conjugated anti-Human IgG1 Fc antibody and analyzed with flow cytometry.

Specification

Product Description	Human DLL3 HEK293F Stable Cell Line
Transfected Cell Line	HEK293F cell
Host	Human
Form	Liquid
Recommend Usage	ELISA Flow Cytometry
Growth Properties	Suspension
Selection Marker	Puromycin
Culture Medium	HEK293-F Expression Medium
Storage Buffer	90% HEK293-F Expression Medium, 10% DMSO

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Instruction	Store at -80°C. For long term storage store at liquid nitrogen storage. Aliquot to avoid repeated freezing and thawing.
Note	FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES OR THERAPEUTIC APPLICATIONS.

Applications

- Flow Cytometry

  Untransfected HEK293 cells (green line) and transfected Human DLL3 HEK293 stable cells (red line) were stained with anti-DLL3 antibody (rovalpituzumab-like), washed and then followed by FITC-conjugated anti-Human IgG1 Fc antibody and analyzed with flow cytometry.

Gene Info — DLL3

Entrez GeneID	10683
Protein Accession#	Q9NYJ7
Gene Name	DLL3
Gene Alias	SCDO1
Gene Description	delta-like 3 (Drosophila)
Omim ID	277300 602768
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a member of the delta protein ligand family. This family functions as Notch ligands that are characterized by a DSL domain, EGF repeats, and a transmembrane domain. Mutations in this gene cause autosomal recessive spondylocostal dysostosis 1. Two transcript variants encoding distinct isoforms have been identified for this gene. [provided by RefSeq
Other Designations	delta-like 3 protein

Pathway

- Notch signaling pathway
